Singapore Night Festival 2015: Illuminate

***By Tung Ching Yew, Spirit of Design Analogy Pte Ltd
BA (Hons) Exhibition & Retail Design, 2008***

Intrigued by the astronomical transformation of a Nebula, in which the interstellar cloud is formed from the remnants of a supernova. SODA envisaged a fantasy of intergalactic space that is defined with continuous light-emitting filaments. These self-illuminated threads connect knots within the "nebula" form various constellations of imaginary high-velocity electrons oscillating through space. The installation was produced as one of the main attractions for the Singapore Night Festival 2015. It is a showcase of fashion pieces that were made with self-illuminating materials by NAFA's own fashion design students.

This project has won Design Excellence Awards 2015's Gold Award under the Installation Design Category.

alumni curated

3D Design Exhibition

Organized by NAFA's 3D Design Alumni Chapter, **Alumni Curated** is the first of its kind exhibition at NAFA, initiated and curated entirely by the chapter's alumni.

This alumni-led showcase presents diverse works by our 3D Design graduates from 1993 to 2017 as well as serves as a platform that provides valuable interaction between generations of artists.

3D Design is about the design of objects, environment and space within personal and public domains.

Alumni Curated, a landmark exhibition
